Objective		
The Fund aims to generate a total return above Sterling cash interest rates, through a flexible allocation to investment grade bonds, non-investment grade bonds and derivative instruments. The Fund may invest in rated and unrated debt securities including bonds, notes of fixed and variable interest, preference shares, equities, convertible and other securities issued by government, quasi-government, supranational, bank and corporate entities, and derivative instruments. The Fund may use forward foreign exchange transactions, futures, credit default swaps and other exchange traded and off-exchange traded derivative contracts for the purposes of efficient portfolio management and/or meeting the investment objectives of the Fund. Such derivative contracts have the potential to significantly increase the Fund's risk profile. Investment in lower rated bonds or non-investment grade debt instruments may also expose the Fund to greater risk of default on individual securities than would normally be the case for a fund invested in higher grade fixed interest securities.

Cazenove UK Absolute Target Fund Acc		
ACD/Manager		Depository/Trustee
Cazenove Investment Fund Management Ltd		J.P. Morgan Trustee and Depository Company Limited
Fund Code	SEDOL	Fund Type
CZUKA	B39VWX1	OEIC
Objective		
The objective of the Fund is to achieve absolute returns through targeted investment strategies independent of United Kingdom market conditions or indices. The ACD will seek to achieve its investment objective by investing predominantly in companies incorporated in the United Kingdom or in companies which derive a significant proportion of their revenues or profits from this country or which are primarily operating in this jurisdiction. Investments will be made predominantly in the equities of large or mid-sized companies and other equity related transferable securities, such as preferred shares, debentures, warrants (not exceeding 5 per cent of the total assets of the Fund) and convertible securities or in derivatives thereof. This does not, however, preclude investment in a limited way in smaller companies. As the Fund has an absolute return objective it will not be managed against any index. Whilst the Fund will mainly invest in equities, it may also invest in debt securities (such as bonds and notes of any maturity which are transferable securities), where this is deemed appropriate in the market conditions prevailing at that time. Any such securities will be rated investment grade by Moody's or S&P, or if not rated, deemed by the investment manager to have at least an equivalent rating and will be issued by the United Kingdom government or companies incorporated in the United Kingdom or in companies which derive a predominant proportion of the revenues or profits from this country or which are principally operating in that jurisdiction. The Fund may also invest in short-term securities which are rated investment grade (such as certificates of deposit, bankers' acceptances and commercial paper) for temporary defensive purposes. The Fund will seek to achieve its investment objective and policy through the use of various investment strategies including the use of derivatives to obtain long and synthetic short positions principally through contracts for differences. The Fund may also use forward foreign exchange transactions, interest rate and government bond futures, and other exchange traded and off exchange traded derivative contracts for the purposes of efficient portfolio management and/or meeting the investment objectives of the Fund. Such derivative contracts have the potential to significantly increase the Fund's risk profile. The ACD employs a risk management process that seeks to control the volatility of Fund returns. The Fund may at any time have substantial holding in ancillary liquid assets.
